

A2  
cont

cooperatively rotating a cutting cylinder with said product [guiding] folding  
cylinder, said cutting cylinder having knife assemblies mounted thereon; and  
moving at least one cyclically engageable product seizing element,  
assigned to at least one of said product [guiding] folding cylinder and said cutting cylinder,  
opposite a sense of rotation of said product [guiding] folding cylinder for engaging a  
respective next product's front portion after a cutting operation.

---

**IN THE ABSTRACT:**

Page 14, line 3, delete "guiding" and insert --folding--;  
line 5, delete "guiding" and insert --folding--;  
line 7, delete "guiding" and insert --folding--;  
line 8, delete "guiding" and insert --folding--.

**REMARKS**

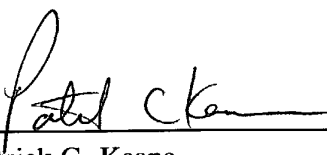

Entry of the foregoing amendments is respectfully requested. By the foregoing amendments, reference to a "product guiding cylinder 1" has been changed to more accurately describe this element as a "product folding cylinder". Claims which encompass such a feature have been similarly amended. On specification page 7, line 7 has been amended to correct a typographical error whereby the second cam follower 29 was referenced, when the sentence should have referenced the "first cam follower 25". Further, an inadvertent reference to the actuating cam "24" has been addressed.

Application No. 09/013,930  
Attorney's Docket No. 011495-031

If there are questions regarding any of the foregoing amendments, it is respectfully requested that the undersigned be contacted at the number shown below.

Respectfully submitted,

BURNS, DOANE, SWECKER & MATHIS, L.L.P.
